

Genuine RG59 Coaxial Cable with Power, 300M Length, Copper, PVC Jacket, Shielded, Ideal for CCTV Installations, 1 Year Warranty | GNC713-PRG59

Description

The shielded coaxial cable features parallel lines of RG59 and DC power wires, allowing you to use it to carry both video and power from your camera. This 2-way cable helps you save both money and time when wiring up a multi-camera system. As this reel is completely uncut, it also provides much more flexibility than standard cables, as you can cut it to exactly the size you need on-site!
